

WORLDWIDE UNIQUE. The innovation of the industries' future.

GHS is a worldwide **unique**, **patented**, **wireless** building automation system for hotels and resorts. It establishes completely new options in management and is the perfect solution for the industries' future.

GHS is more efficient, more effective and more secure. It is economical and in equal measure ecological.

GHS IS THE SOLUTION OF THE FUTURE:

CUSTOMIZABLE ROOM DEVICES

RFID external reader/ Access control

Internal card reader/ energy saver

Thermostat

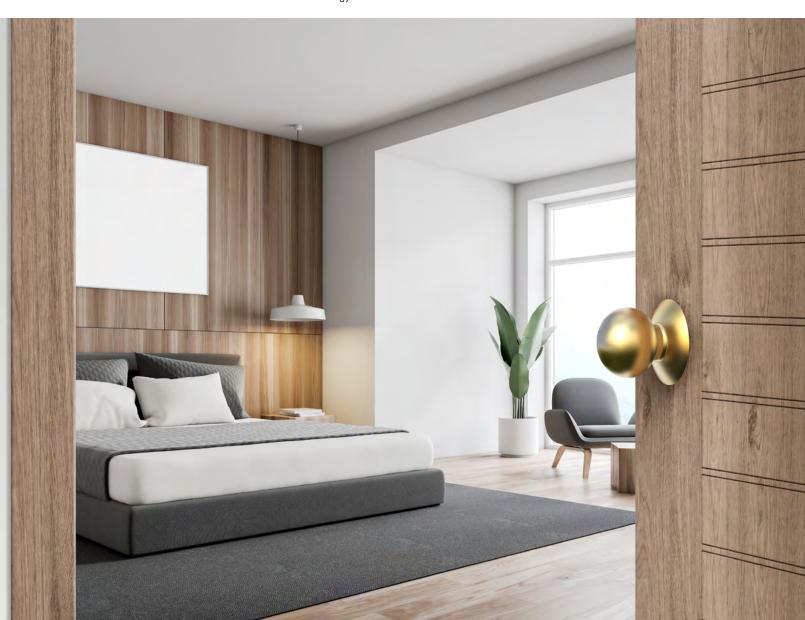

Window sensor

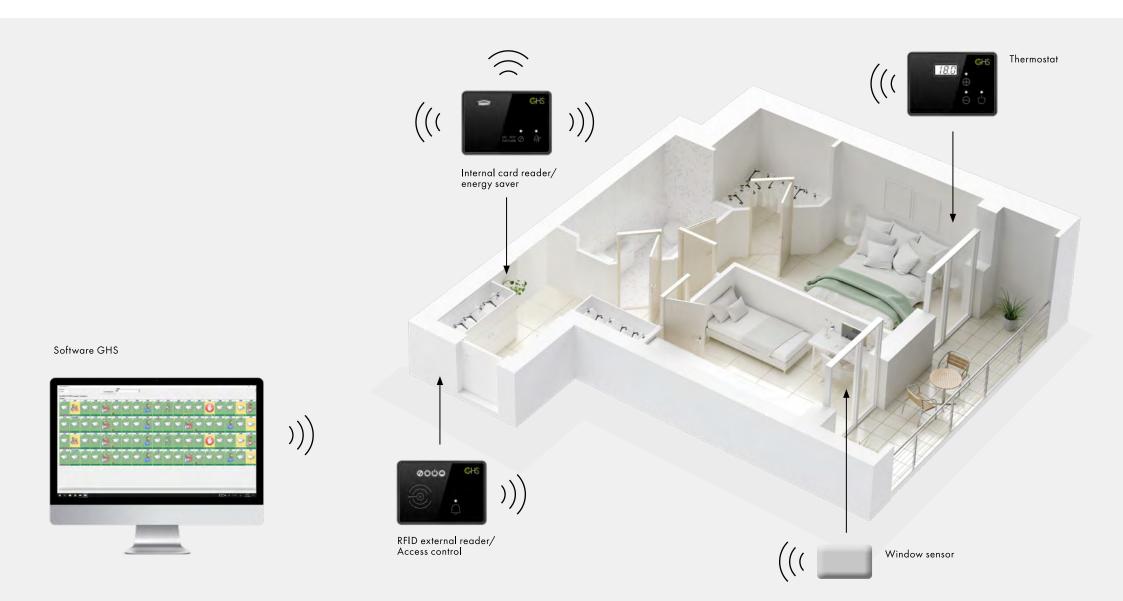

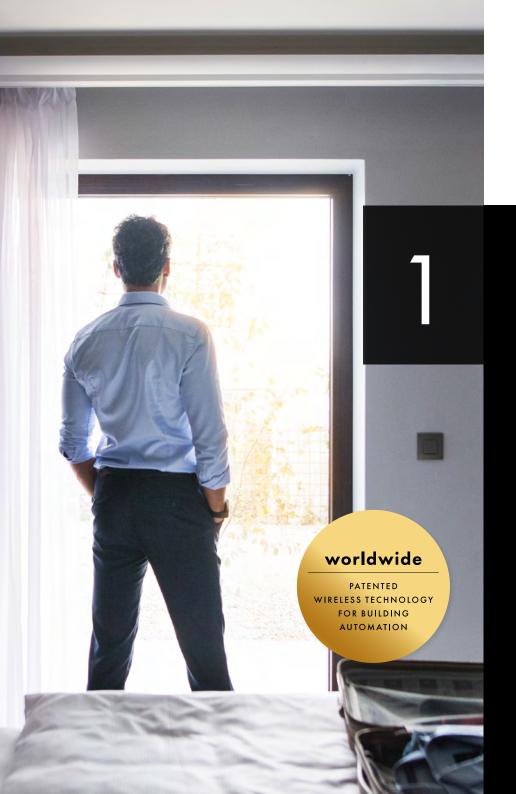

All room devices are customizable with individual theme, colour and branding.

100% WIRELESS ROOM DEVICES

EASILY INSTALLED. MAINTENANCE FREE.

Thanks to the entirely wireless Zig-Bee-Technology installation demands almost no time and can take place during ongoing buisiness:

- ✓ approx. 2–3 hours per room
- ✓ no wiring, no data network
- ✓ no replacement of locks or doors
- ✓ no renovation works or down-time
- ✓ room devices operate without batteries
- ✓ no usage of presence or infrared sensors
- ✓ no additional software to download any data of the locks
- \checkmark completely maintenance free
- ✓ for hotels and resorts of all sizes and varieties

EFFICIENT ONLINE-ADMINISTRATION

GHS-real-time-management enables monitoring of all activities and thereby guarantees a maximum of security and efficiency:

- ✓ real-time controlling and timing of all hotel areas
- ✓ real-time monitoring of all new guests, presences, events, etc.
- ✓ online monitoring of staff activities
- ✓ online cleaning and maintenance reports
- ✓ real-time monitoring of doors and windows
- ✓ real-time alarm if doors or windows are opened by force
- ✓ remote-controlled doorway in case of emergency
- ✓ remote-controlled room rotation and card cancellation
- ✓ various access authorization ranks for the staff
- ✓ various user levels for software access

INTELLIGENT. ECONOMICAL. ECOLOGICAL.

The patented GHS Software interacts permanently and in real-time with all electronical components of the rooms and all temperature parameters of the thermostats:

- \checkmark up to 45% power saving
- ✓ extremely high power efficiency
- ✓ fast return on investment

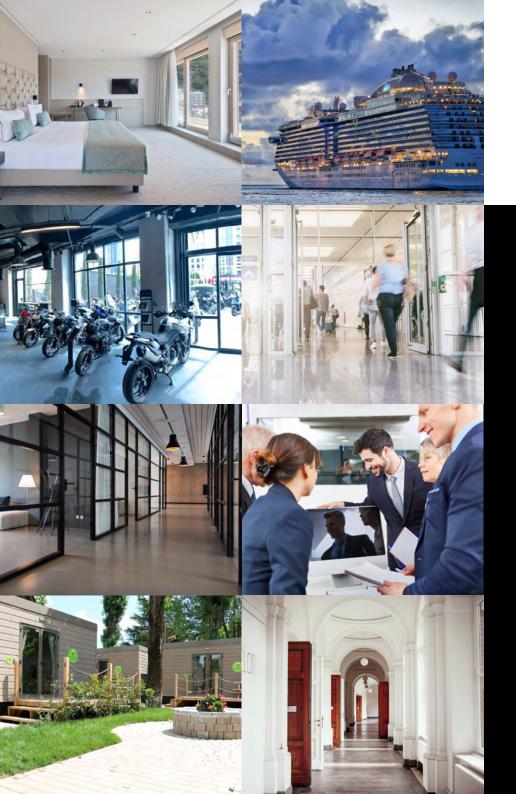

SYSTEM BUNDLES

BUILDING AUTOMATION SYSTEM

worldwide

PATENTED
WIRELESS TECHNOLOGY
FOR BUILDING
AUTOMATION
